DETAILED ACTION

Claim Objections

1. Claims 30-31 are objected to because of the following informalities:

Regarding Claim 30, it appears that the phrase "a pattern formed on said earthed conductor, and that enables to change the area and position of the earthed conductor" should more appropriately read as --at least one of the earthed conductors is formed as a pattern that has portions that are removed-- since there are two earthed conductors and nothing in the elected embodiment is changeable, but rather is including removed portions of the earthed conductor.

Regarding Claim 31, it appears that the phrase "which formed one side" should read as --which is formed on one side-- to improve the grammatical form.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 29-33 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kenney (US 5,334,800 of record).

Kenney (US 5,334,800) (e.g. Fig. 3) of record teaches a circuit board including: a dielectric substrate having lattice shaped ground conductors (i.e. they do not cover the entire area since they have void portions, and thus are enabling change and position in

the same manner as applicant's claimed invention, and especially since the Kenney structure is identical to the presently claimed invention) on its surfaces (e.g. see Keeney claim 1) (Claims 30-33); signal lines (40) are in the dielectric; and ground vias are on the periphery of the device only and connect the two earthed conductors (e.g. see Fig. 3 and Col. 3, lines 2-4) (Claim 29).

Response to Arguments

4. Applicant's arguments with respect to claims 29-33 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
